

AGT Major Service Outage Overview

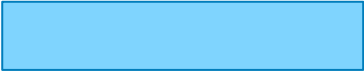

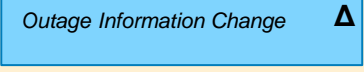

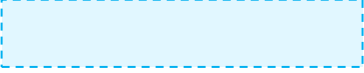

June 29, 2022

Disclaimer

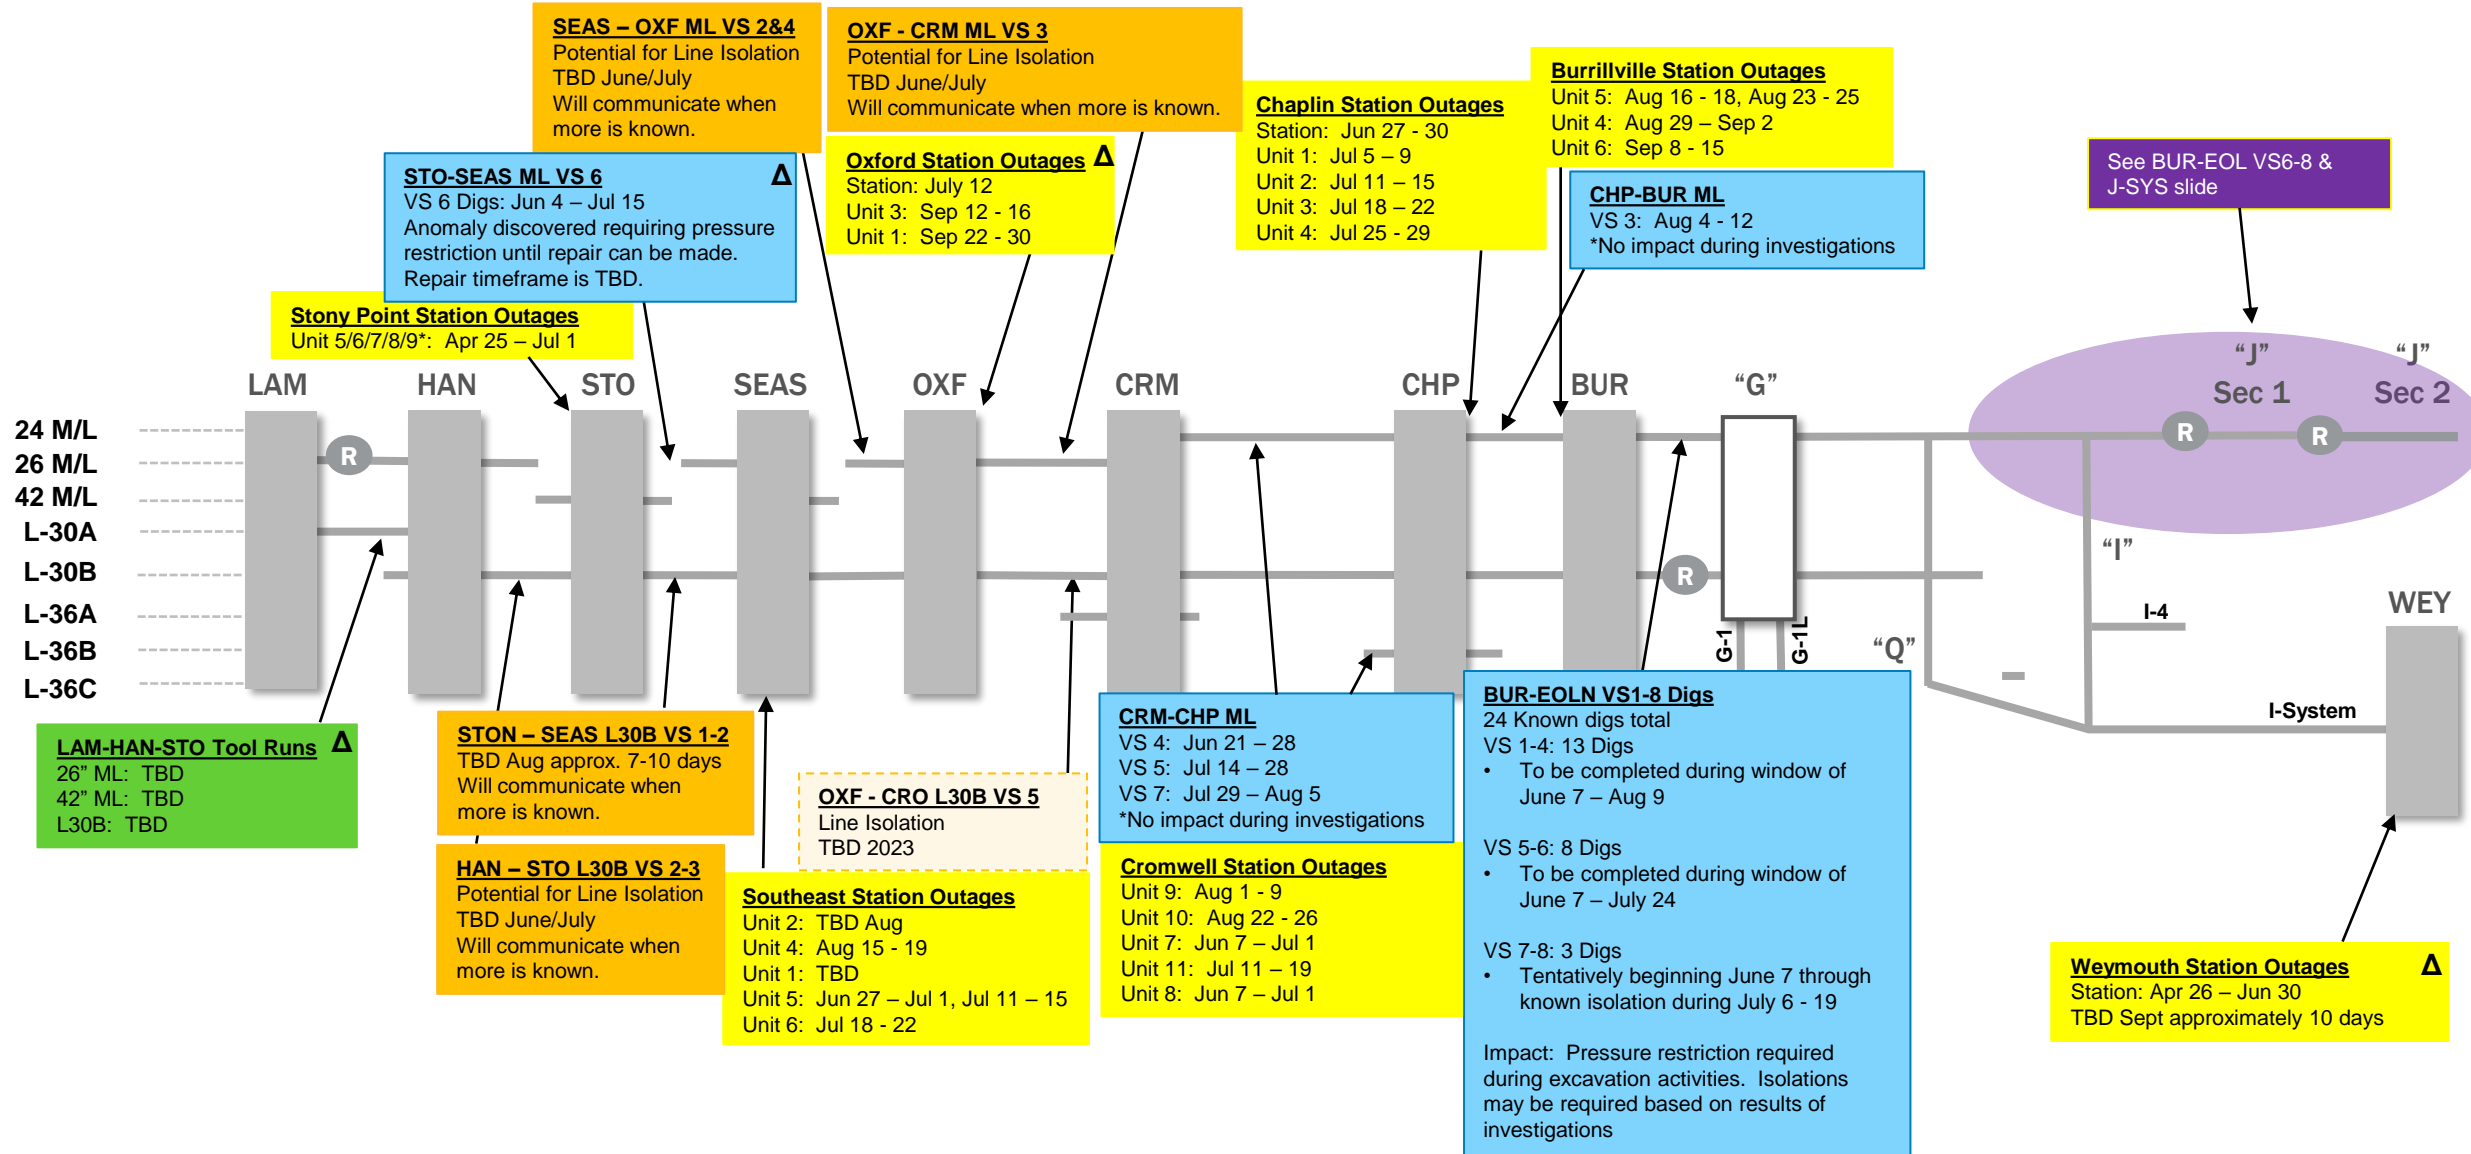

- This overview contains a list of outages across the AGT system that are anticipated to significantly impact: mainline capacity, lateral system capacity, and/or have an impact to single tapped meters.
- This overview may not include a complete list of outages that will occur during the outage season, and AGT reserves the right to update this list to reflect additional outages when the timing of such outages can be reasonably forecasted. For a complete list of AGT outages and capacities, please be sure to refer to AGT's regular service outage postings. Additionally, more detailed information for each outage is also included on the service outage posting.
- Due to unforeseen delays and/or scheduling conflicts, the dates of the outages listed are subject to change. Any changes to the outage plan will be posted at the earliest practical date. Furthermore, when operationally feasible, AGT will coordinate with upstream and downstream point operators as necessary, to help minimize the operational impact of outages.
- Parties are urged to monitor AGT's informational postings to access the most current information.

Legend

	Inspection/Maintenance Digs
	Tool Runs
	Compressor Unit / Station Outages
	Miscellaneous Outages (such as installation pig launchers/receivers, meter outages for specialized tool runs, etc.)
	Refer to another slide for more information
	Outage/Maintenance Work
	Pressure Restriction
	Change to Service Outage information (indicated by "Δ" symbol); Changed outage information <i>italicized</i>
	Work that is currently planned for a following year is indicated in a "faded" & dashed lined box.

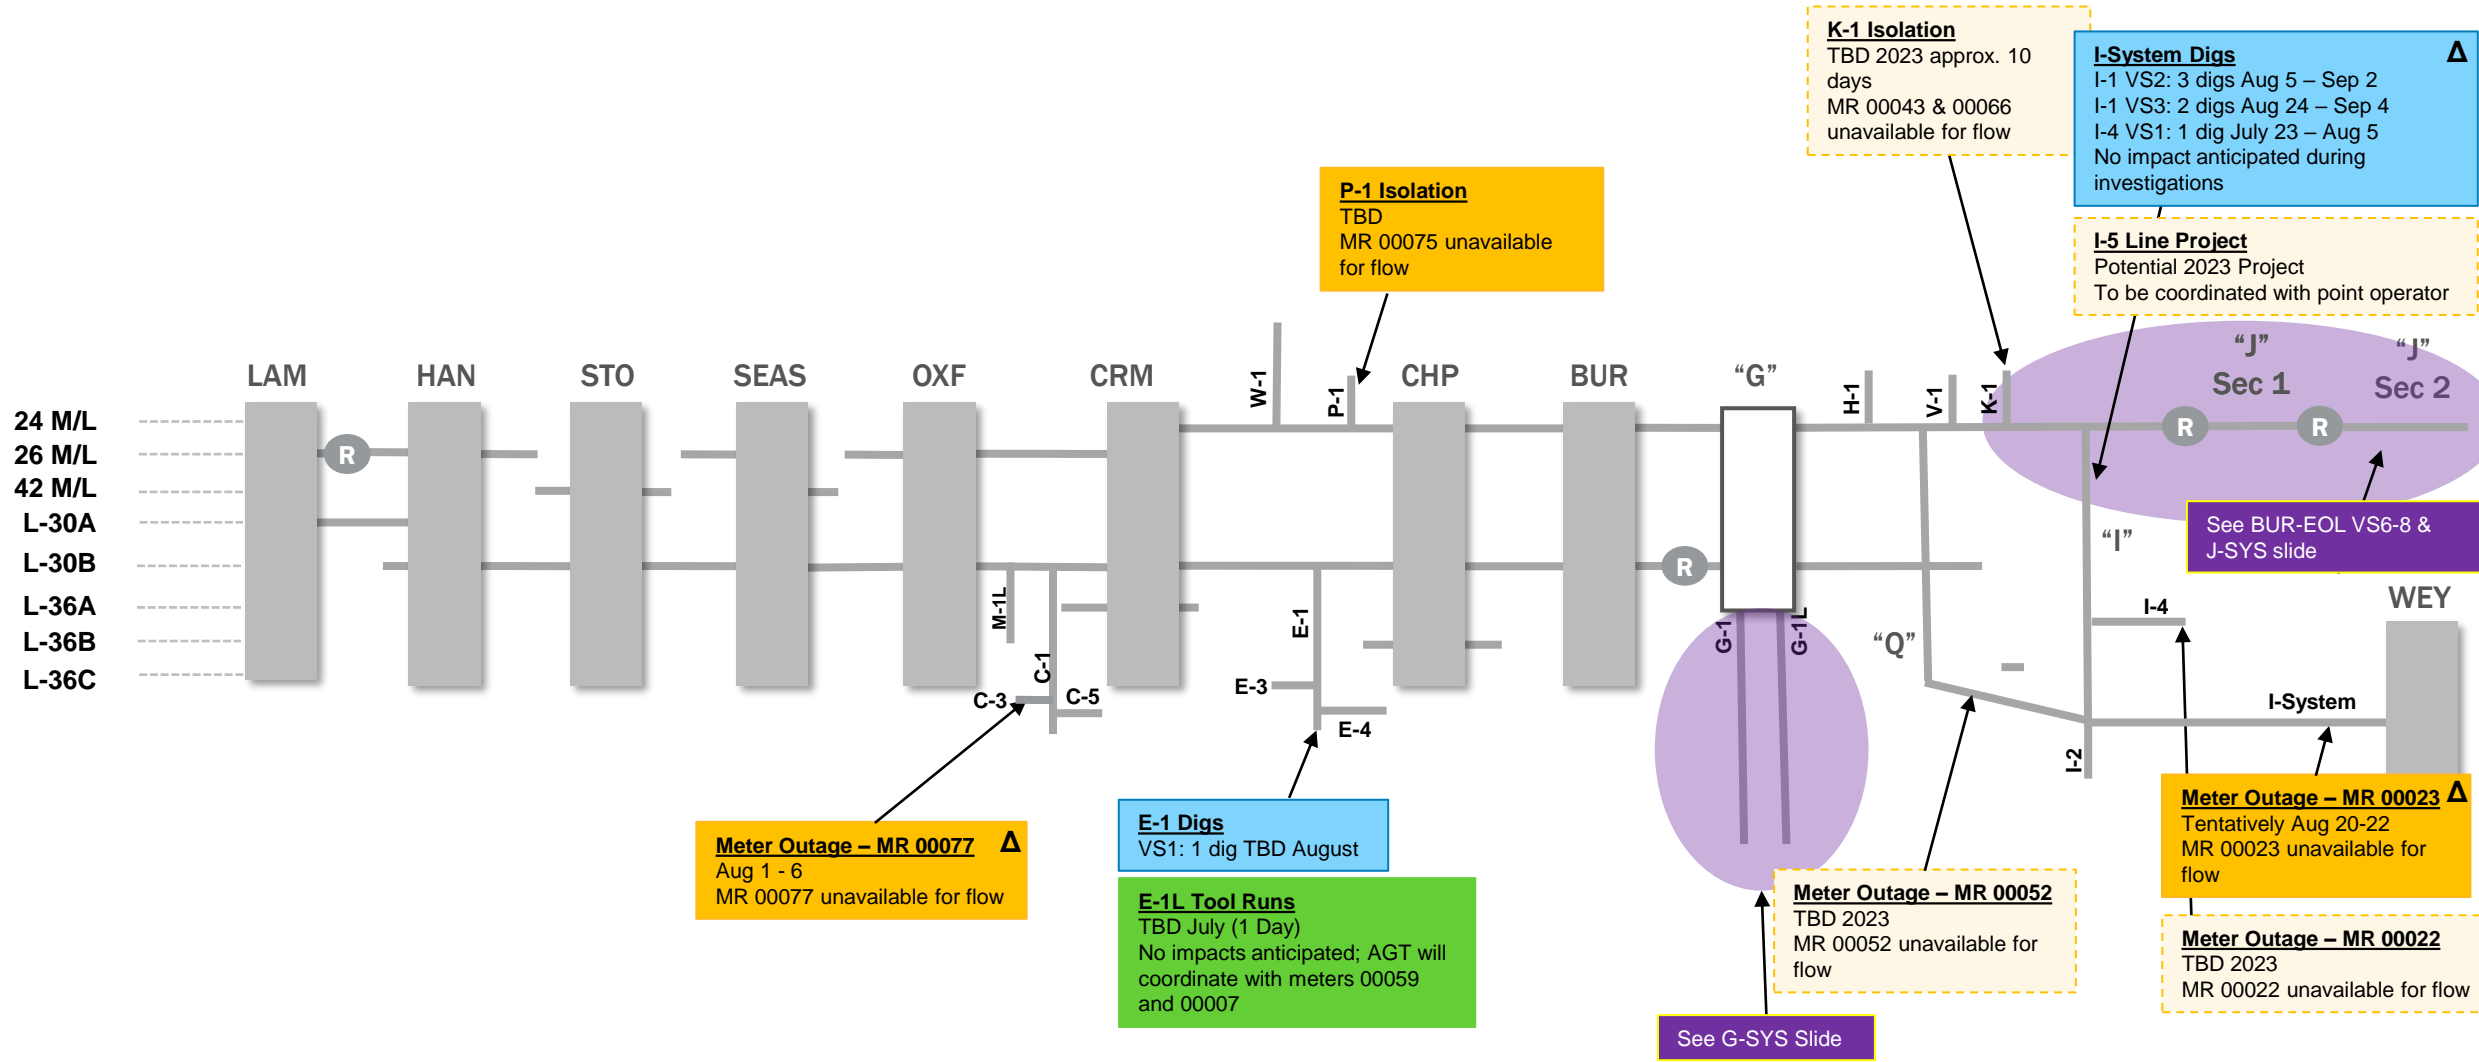

AGT System – Mainline Outages and ILI Tool Runs

This overview contains a list of outages across the AGT system that are anticipated to significantly impact: mainline capacity, lateral system capacity, and/or have an impact to single tapped meters. To view a complete scope of upcoming outages as well as more detailed information for each outage please refer to AGT's regular service outage postings. Schematics for illustrative purposes only.

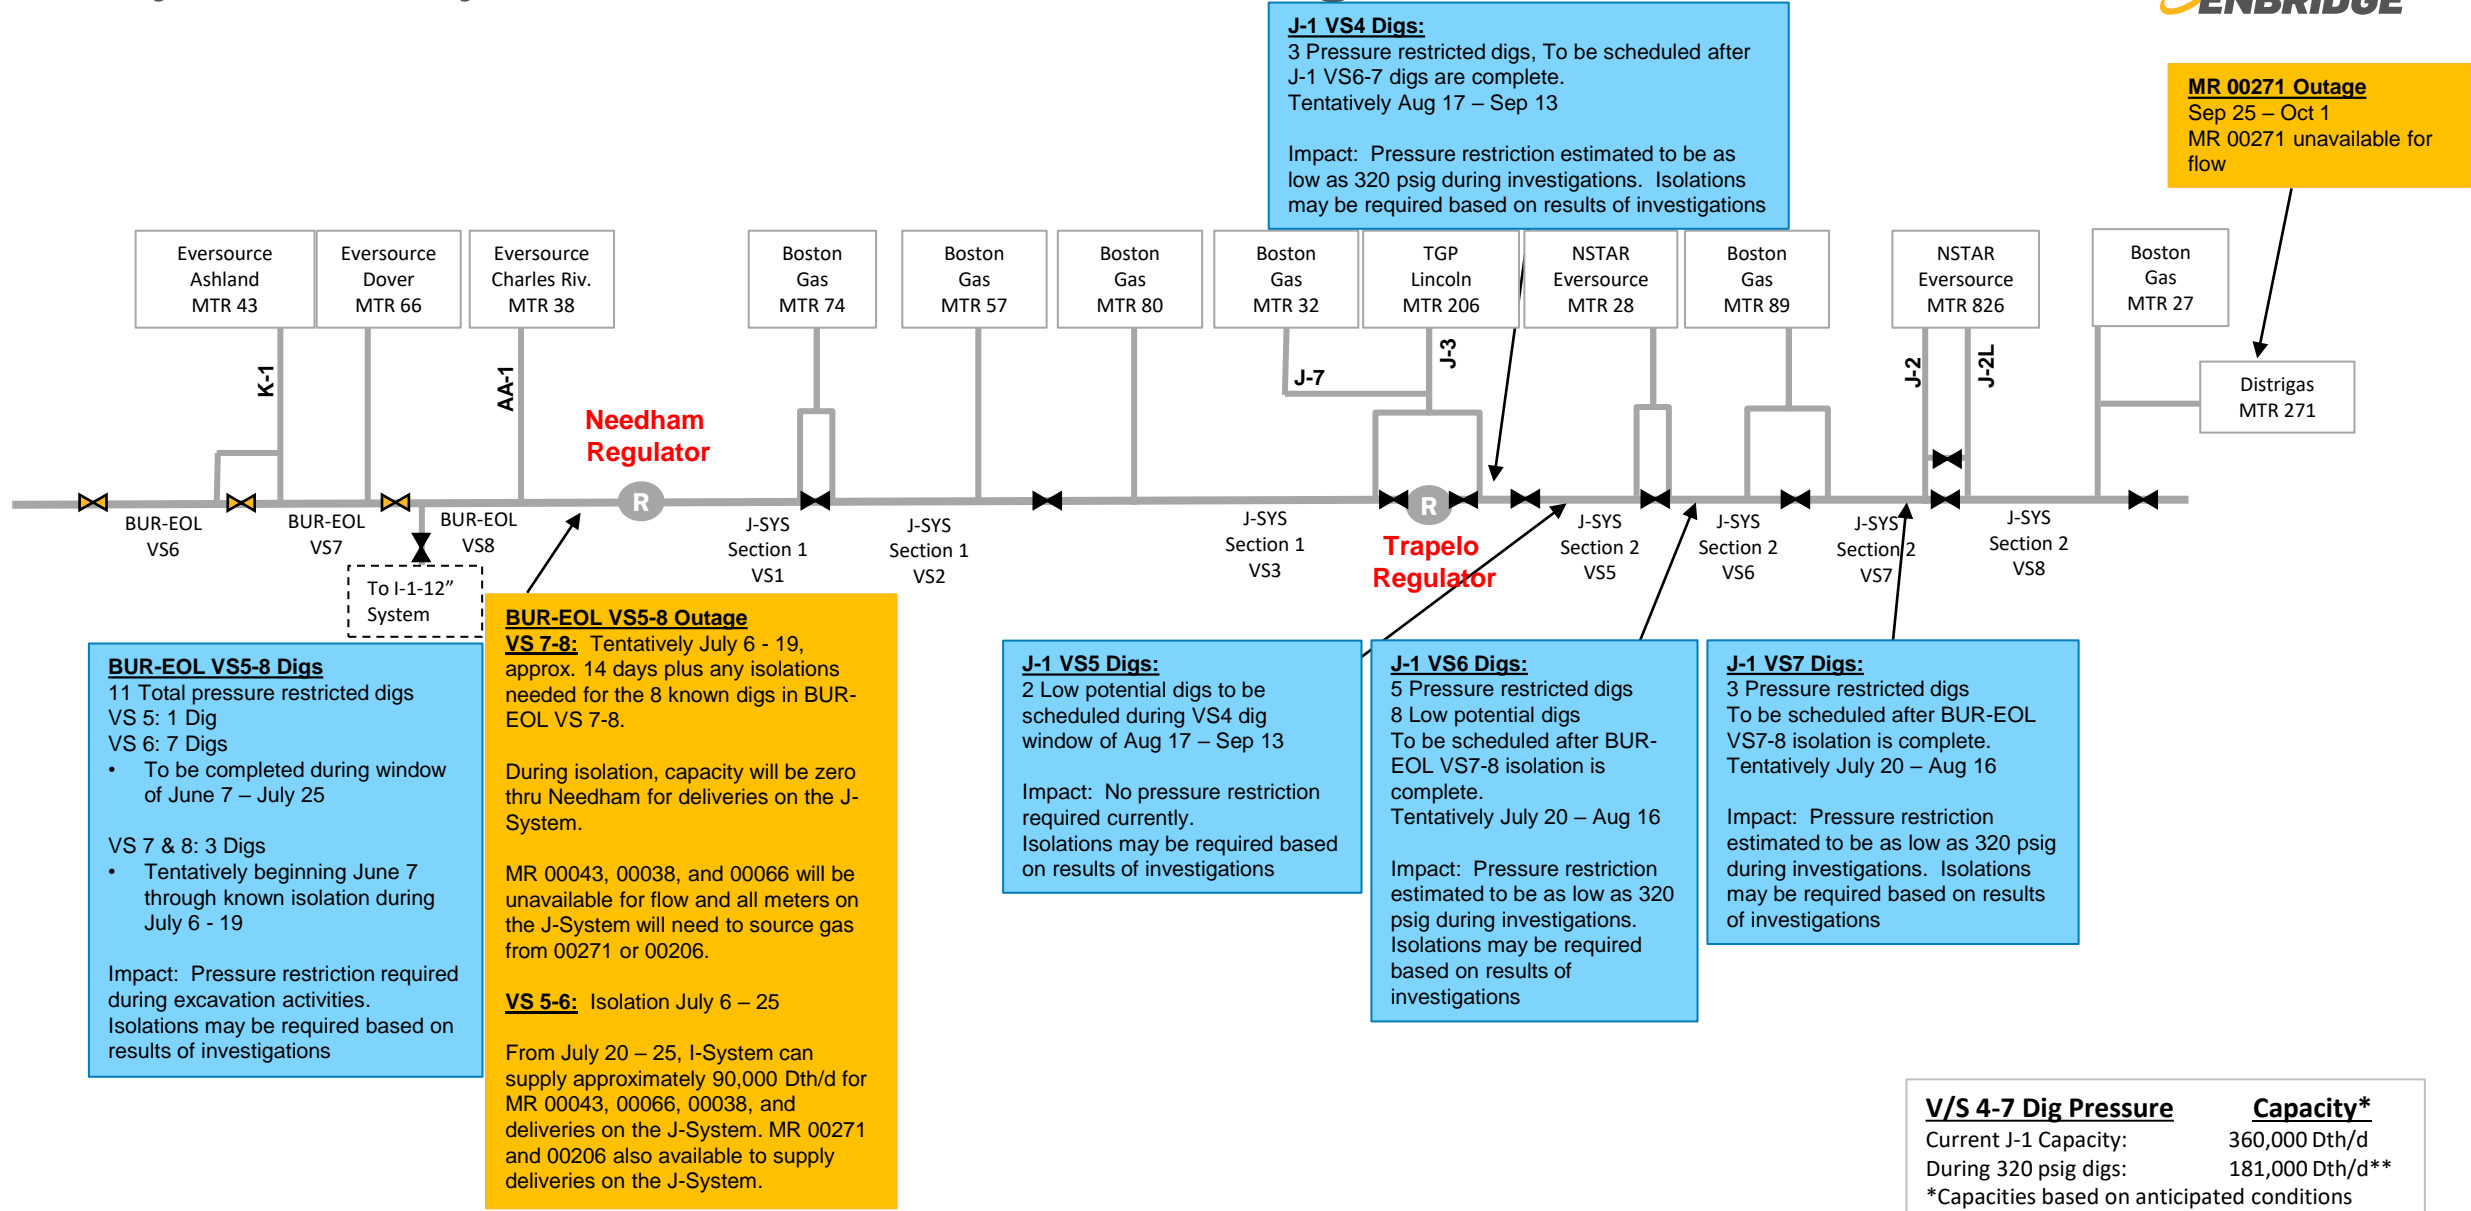

*Units out 1 at a time sporadically during timeframe

AGT System – Lateral Outages and ILI Tool Runs

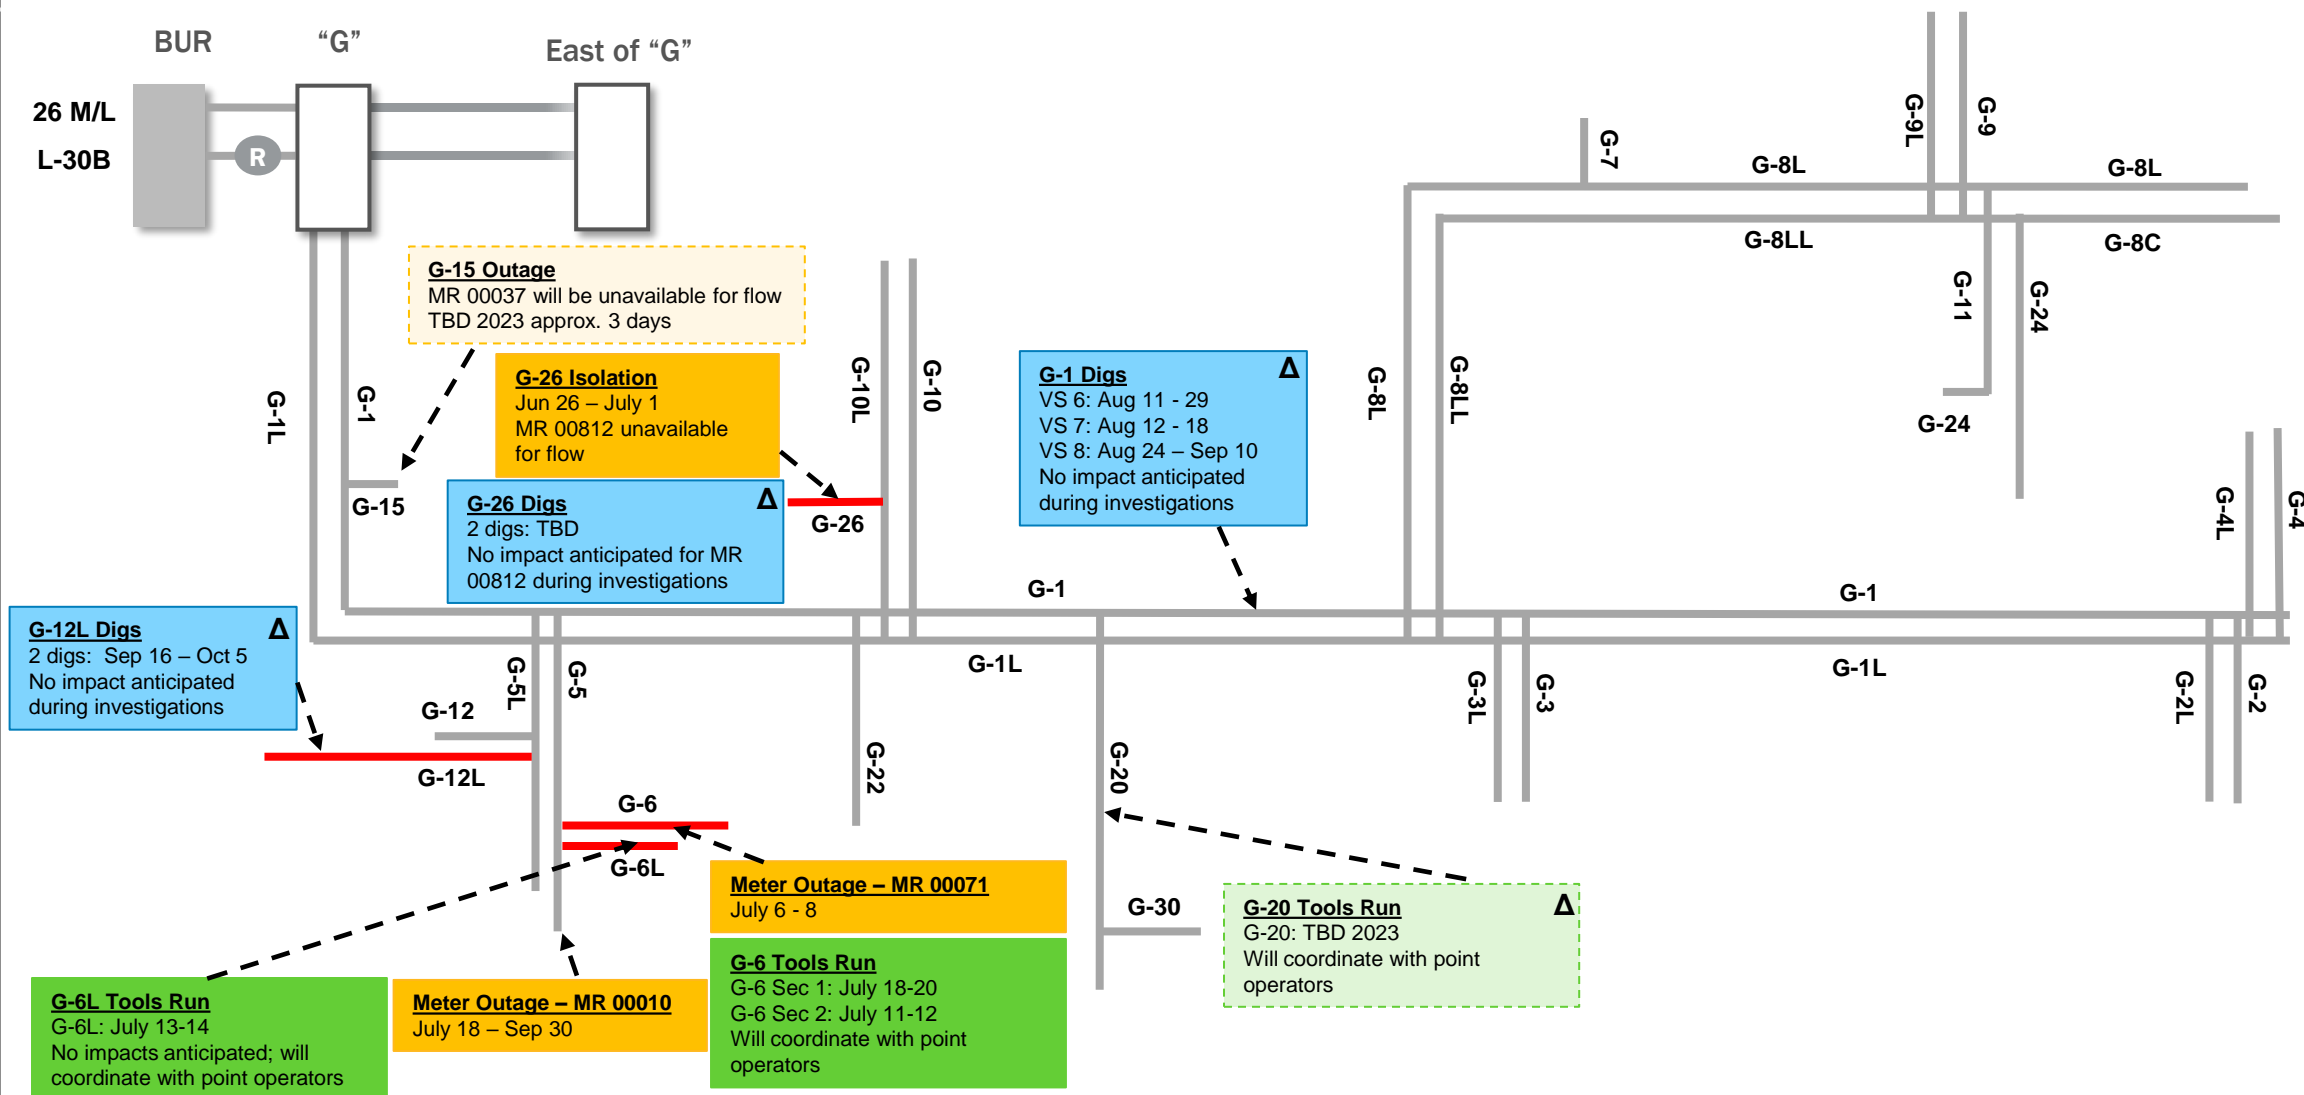

This overview contains a list of outages across the AGT system that are anticipated to significantly impact: mainline capacity, lateral system capacity, and/or have an impact to single tapped meters. To view a complete scope of upcoming outages as well as more detailed information for each outage please refer to AGT's regular service outage postings. Schematics for illustrative purposes only.

AGT System – J-System and BUR-EOL VS5-8 Outages and ILI Tool Runs

This overview contains a list of outages across the AGT system that are anticipated to significantly impact: mainline capacity, lateral system capacity, and/or have an impact to single tapped meters. To view a complete scope of upcoming outages as well as more detailed information for each outage please refer to AGT's regular service outage postings. Schematics for illustrative purposes only.

AGT System – G-System

This overview contains a list of outages across the AGT system that are anticipated to significantly impact: mainline capacity, lateral system capacity, and/or have an impact to single tapped meters. To view a complete scope of upcoming outages as well as more detailed information for each outage please refer to AGT's regular service outage postings. Schematics for illustrative purposes only.
