

Pursuant to Section 6.3 of the General Terms and Conditions of Valley Crossing Pipeline, LLC Regarding Intrastate Transportation Service in the State of Texas (“GT&C”) and Section 6.3 of the Statement of Operating Conditions of Valley Crossing Pipeline, LLC for Transportation Service Pursuant to Section 311 of the Natural Gas Policy Act (“SOC”), Valley Crossing Pipeline (“VCP”) hereby notifies all shippers of the following planned maintenance schedule:

Agua Dulce (Agua Dulce) and Brownsville (Brownsville) Compressor Station Maintenance:

As part of VCP’s comprehensive integrity assessment of its pipeline system, VCP will be conducting compressor station outages at its Agua Dulce Compressor Station and at its Brownsville Compressor Station to conduct maintenance. During these outages, VCP will be required to limit nominations at Agua Dulce and Brownsville to the following schedule:

*Start Date	**End Date	***Capacity
6/21/2021	6/30/2021	2,508,000
7/7/2021	7/16/2021	2,497,000

*Start Date denotes 09:00 AM CCT on start of Gas Date

** End Date denotes 09:00AM CCT on end of Gas Date

*** Denotes units of measurement in Dekatherms per Day.

Brownsville (Brownsville) Compressor Station to End of Line:

Cleaning Tool Runs: Complete

ILI Tool Runs: Complete

Tool Run Results/ Potential Repairs: June 29, 2021

Depending on the results of the ILI tool runs, and if further detailed investigations or maintenance are required, the following meter may also experience lower than normal pressures or be unavailable for flow:

40830 – MARINA DEL GOLFO (TRANSCANADA)

*****Enterprise Intrastate (Channel) MR 45807: July 7-14, 2021**

VCP has been informed by Enterprise Interstate that they will be performing scheduled maintenance at their interconnect with VCP MR45807. During this scheduled maintenance the meter will be unavailable for flow.

In addition, during this outage, VCP will take this opportunity to perform maintenance on the VCP side of the meter.
